

Optimum T4200 Family

Parts Guide

Product	Part Number	Description
	010332-xxx	Optimum T4210 Terminal (with dial) The T4210 has high-end features normally found in expensive IP and wireless models, such as 24MB of total memory, an ARM9 processor for fast transactions and multi-application. It's also PCI PED approved so you can support debit with or without an external PIN pad. The T4210 is simply ideal for worldwide acceptance because it accepts both magnetic stripe and chip card transactions (with an optional EMV-approved reader).
	010332-xxx	Optimum T4220 Terminal (with Ethernet IP and dial backup) The T4220 is the most capable IP and dial terminal in the industry today with its integrated PCI PED approved PIN entry capability, its HyperSafe 32-bit architecture and unrivaled IP transaction and download speeds. It also comes standard with its own IP diagnostic application so you can easily tell where the error occurred and then how to fix it. Equipped with more memory, the T4220 accepts more applications to meet your needs and accepts both magnetic stripe and chip card transactions (with an optional EMV-approved reader).
	010332-xxx	Optimum T4230 Terminal (with GSM/GPRS and dial backup) The T4230 is a unique wireless terminal that offers GPRS connectivity in a countertop design. A standard feature with the T4230 is its V.34 modem, so now you have the choice of using dial or wireless with dial backup wherever you are. The T4230 is simply ideal for worldwide acceptance because it accepts both magnetic stripe and chip card transactions (with an optional EMV-approved reader).
	050455-xxx	Optimum Developer's Toolkit (Intel XScale & ARM version)
	710015-003	Paper Roll (50mm diameter; thermal)
	870065-002	A/C Power Adapter
	810005-010	RJ11 Cable (Telephone cable)
	040348-001	Privacy Shield
	810389-001	Mono Cable
